

## DEE SHEEP

Hook - Black Double  
Thread - Black  
Tag - Oval Silver  
Tail - GP Crest  
Butt - Yellow Floss  
Rib - Silver Oval  
Body - Black Floss  
Hackle - Mid Blue Cock  
Wing - Yellow Polar Bear or Fox  
Black Fox Pelt or Squirrel or Arctic Fox  
Eyes - Jungle Cock

Secure the hook in the vice. Tie in the thread and wind down to opposite the hook point tying in a length of Silver Oval. Form a tag with the oval about 3 turns and trim off. Tie in a Golden Pheasant Topping for the tail, about the same as the body length. Tie in a length of Yellow Floss and wind the thread forward about 3mm. Wind the floss up to this point to create a butt and tie in. Tie in a length of Silver Wire and a length of Black Floss. Wind the thread back to the head binding everything in and trim the waste. Wind the floss up to the this point forming a neat body, tie in and trim off. Rib the body with the Oval, tie in and trim off. Tie in a Mid Blue cock hackle by the tip, double it and wind 3 turns. Pull the fibres downwards and take some turns of thread over the base to slope them backwards. Wax your thread. Prepare and tie in a small bunch of Yellow Polar Bear for the underwing, this should reach about half way down the tail. Prepare and tie in a bunch of Squirrel or Black Fox Pelt or Arctic Fox for the wing just reaching the end of the tail. If you use Fox take out the underfur as you just want the guard hairs. Trim off the butts, apply a small drop of thin clear varnish and bind down tightly. Prepare a pair of Jungle Cock eyes about half the body length and tie them in on the sides. Form a neat small head and whip finish. Now apply several coats of thin clear varnish to produce a smooth shiny head.

There are lots of slight variations of this pattern.
