Secure the Rig in the vice by the rear eye. Tie in the thread and wind it down to the rear eye. Tie in a length of GloBrite #4 floss and take the thread forward 3mm. Wind the floss up to here forming the tag, tie in and trim off. Dub the thread with the flash and wind it back and forth to create a small ball. Tie in a GP Rump feather by the tip, double it and wind until you run out of feather, tie in and trim off. Tie in a Large Yellow cock hackle by the base, double it and wind until it is dense enough for your taste, tie in and trim off. Take 8 strands of Orange dyed Amherst Pheasant tail and tie them in spread around the shank.

Take the thread to the head tying in the waste and trim off.

Return the thread to the tail tying in a length of Med Gold Wire on the way down. Tie in a length of Holo Gold and take the thread to the head, leave about 8mm clear. Wind up the Holo to form the body and then rib with the wire. Tie in tight and trim off.

Dub the thread with flash and wind to form a small dubbing ball.

Tie in a GP Rump feather dyed Orange by the tip, double it and wind until you run out of feather, tie in and trim off. Tie in a Large Orange cock hackle by the base, double it and wind until it is dense enough for your taste, tie in and trim off. Tie in a Large Black Schlappen hackle by the tip, double it and wind until it is dense enough for your taste, tie in and trim off. Take 4 strands of Yellow dyed Amherst tail and 4 strands of Natural and tie them in spread around the shank. Trim off the waste and whip finish. Varnish the head as normal.
