

SUPREME SUNBURST

Tube – Black
Tag – UTC Mirage
Rib – Silver Wire
Body – FF Midnight Star dubbing
Wing – Sunburst Polar Bear
Sunburst Tanuki
Hackle – Sunburst cock
Orange Schlappen
Eyes – Jungle Cock
Head – FF Hybrid cone 6 mm Red

Prepare a Black Tube leaving 10mm of the inner tube poking out the front. Secure the tube in the adapter. Tie in the thread on the outer tube and take down to the tail. Tie in a length of UTC Mirage tinsel and wind the thread forwards 4mm. Coat this rear body with superglue and then wind the Mirage up to the thread forming the tag, tie in and trim off. For extra security you can give the tag a coat of nail varnish.

Tie in a length of Silver wire tightly and trim the waste.

Dub the thread with FutureFly Midnight Star dubbing and wind the thread up to the head of the outer tube forming the body. Rib with the Wire, tie in and trim off the waste. Use your Velcro brush to tease out the body fibres.

Take the thread onto the inner tube and form a bed of thread. Tie in a small bunch of Sunburst Polar Bear, about the same length as the tube. Bind down tightly and trim the waste.

Tie in a bunch of Sunburst Tanuki to reach the end of the hook. Spread the Tanuki with your thumb nail to produce a tear drop shape. Bind in tightly and trim the waste.

Tie in an Sunburst cock hackle by the tip, double it and wind 3 turns and tie in. Tie in an Orange Schlappen hackle by the tip, double it and wind 3 turns and tie in. Prepare and tie in a pair of Jungle Cock eyes, fold back the waste stalks and bind in tightly. Trim off the waste.

Form a small head and whip finish. Fix the cone in place by cutting the tubing to 2mm and then flame over the end.
